#### 1. Organizational Background

Transparency Maldives (TM) is a non-partisan organization that endeavors to be a constructive force in society by promoting collaboration and discussion on corruption, transparency, and accountability. TM seeks to engage with stakeholders from all sectors (government, business, political and civil society, among others) to raise awareness of corruption's detrimental effects on development and society, improve transparency and accountability in governance, and eliminate corruption from the daily lives of people.

TM received formal government registration in 2007 and is the National Chapter of Transparency International in the Maldives.

#### 2. Eligibility

Organizations/Firms/Individuals

#### 3. Period of Performance:

August 2022 for a period of eight weeks

#### 4. Scope of work

State Owned Enterprises (SOEs) are often concentrated in critical areas of the economy and plays a central role in providing basic goods and services. Therefore, it is crucial for these Enterprises to strike a balance between profitability and social responsibility in their operations. While control of SOEs is often with the government, their transparency and accountability are important to ensure that they are being well managed and run for the societal benefit.

The Strengthening Accountability Networks among Civil Society Project (SANCUS), which TM is currently implementing, aims to strengthen the legal and regulatory framework for the operation and functionality of SOEs, as well as improve the governance, functions, and operations of SOEs.

Towards this end, TM is looking for a consultant to develop a social audit methodology to collect information on government projects awarded, loans and financing availed, and sovereign guarantees given to SOEs. The information collected will be used by TM to raise awareness and advocate for the performance governance, accountability and oversight of SOEs. The methodology should be developed in consultation with relevant stakeholders, oversight and regulatory agencies and community actors such as civil society organizations.

The methodology should be accompanied by a toolkit, which can be used to train community-based youth groups who will monitor the projects being carried out by SOEs. The toolkit can be in the form of a comprehensive questionnaire that can be used to periodically assess SOE related programs and projects in local communities and should provide meaningful insight into the operations and impact of SOEs in these communities.

The scope of the social audit should encompass all information regarding government projects awarded, loans and financing availed, and sovereign guarantees given to SOEs, including but not restricted to the procurement and awarding of projects, costs, durations/timelines, locations, project deliverables and targeted beneficiaries.

Specific responsibilities include:

- Preliminary meeting with the project team to understand the scope of work and timeline.
- Review of various social audit methodologies, international best practices, and principles.
- Consultation with relevant stakeholders such as intended beneficiaries, SOEs, oversight and regulatory agencies and community actors such as civil society and youth groups.
- A social audit methodology which is based on the Maldivian context including updates and discussion with TM project staff at regular intervals for feedback.
- Prepare and submit a report and prepare a toolkit based on the social audit methodology.
- Develop a training package with guidance and guidelines to use the social audit toolkit.
- Conduct training for TM staff and monitors on the usage of the toolkit to build a pool of qualified trainers to ensure successful implementation of the program.
- Ensure the work is completed and delivered according to the agreed timeline.
